## Home Safety Check List

### Safety Concerns

### Creating a Safe Environment

When you walk through a room, do you have to walk around furniture?	<input type="checkbox"/> Ask someone to move furniture so your path is clear
Do you have throw rugs on the floor?	<input type="checkbox"/> Remove the rugs or use double-sided tape or a non-slip backing so the rugs won't slip.
Do you have to walk over or around wires or cords (like lamps, telephones, or extension cords)?	<input type="checkbox"/> Coil or tape cords and wires to the wall so you can't trip over them.
Do you have any steps that are broken or uneven?	<input type="checkbox"/> Call to have loose or uneven steps repaired.
Are you missing a light/or are any lights out of order over your stairways?	<input type="checkbox"/> Have a friend or family replace any missing lightbulbs or call an electrician to have a light placed at the top and bottom of the stairs.
Are any handrails loose or broken? Is there a handrail on only one side of the stairs?	<input type="checkbox"/> Fix any loose handrails or have new ones put on ensuring they are on both sides of the staircases.
Are there things you use often in your kitchen that are on high shelves?	<input type="checkbox"/> Move frequently used items into your lower kitchen cabinets keeping them at waist level if possible.
Is your step stool unsteady?	<input type="checkbox"/> If you must use a step stool, get one with a bar to hold on to. Never use a chair as a step stool.
Do you need some support when you get in and out of the tub or up from the	<input type="checkbox"/> Install grab bars inside the tub and next to the toilet. There are also toilet

toilet?	seat raisers available for purchase as well as self-stick strips that be placed on the floor of the tub or shower.
Is the light near the bed hard to reach?	<input type="checkbox"/> Place a lamp close to bed where it is within arm's reach.
Is the path from your bed to the bathroom dark?	<input type="checkbox"/> Put in a night-light so you can see where you are walking. Some night-lights go on by themselves after dark.

### Additional Tips to Prevent Falls

- Exercise regularly to improve your balance and coordination as long as your doctor tells you this is ok.
- Have your doctor or pharmacist look at all the medicines you take even the over-the-counter medicines. Some medicines can make you sleepy or dizzy .
- Have your vision checked at least once per year by an eye doctor. Poor vision can increase your risk of falling.
- Get up slowly after you sit or lie down .
- Wear shoes both inside and outside of the house. Avoid going barefoot or wearing slippers.
- Improve the lighting in your home. Put in brighter light bulbs; florescent bulbs are bright and cost less to use.
- It's safest to have uniform lighting in a room. Hang lightweight curtains or shades to reduce glare.
- Keep emergency numbers in large print near each phone.
- Put a phone near the floor in case you fall and can't get up.
- Think about wearing an alarm device that will bring help in case you fall and can't get up.
